

# Asterfusion RMA Process and Warranty Policy

To ensure efficient resolution of issues encountered during device operation, Asterfusion provides the following updated RMA (Return Material Authorization) process and warranty policy.

## 1. Warranty Policy

### 1.1 Hardware Warranty (2 Years Standard)

All Asterfusion hardware products include a **2-year hardware warranty** starting from the delivery date. This warranty covers natural hardware failures or product defects not caused by user-induced damage.

### 1.2 Software Terms

AsterNOS (SONiC Enterprise Software) is **preloaded with a perpetual license included**.

Asterfusion provides:

- **1-year free major version upgrades**
- After the first year, **major version upgrades are available via an annual subscription at 10% of the system price**

Software support during the first year includes:

- Technical support
- Bug fixes and patches
- Software upgrades

## 2. Initial Troubleshooting (Email Support)

When a device issue occurs, customers should contact their Asterfusion sales manager or submit a ticket via the support portal:

<https://help.cloudswit.ch/portal/en/home>

Our team will assist with:

- Log collection
- Configuration verification
- Preliminary issue analysis

## 3. Advanced Diagnostics (Remote Access / Online Meeting)

If the issue cannot be resolved via email, Asterfusion will arrange remote access or an online session for real-time diagnostics and root cause analysis.

## 4. Hardware Issue Diagnosis and Handling

### 4.1 Non-User-Induced Hardware Failure (Within Warranty)

If the issue is confirmed as a non-user-induced hardware failure, Asterfusion will provide **free repair or replacement**.

Process:

1. Customer ships the device or Asterfusion arranges collection
2. Inspection and repair completed within **10 calendar days**
3. Device is returned immediately after repair

An official **RMA Repair Report** will be provided, including:

- Root cause analysis
- Diagnostic results
- Repair actions
- Parts replaced (if applicable)
- Technical recommendations

### 4.2 User-Induced Damage (Out of Warranty Scope — Chargeable)

The following conditions are considered **user-induced damage** and are not covered under warranty:

- Improper insertion/removal causing port damage
- Power issues due to non-compliant power supply or cabling
- Unauthorized disassembly, repair, or modification
- Unauthorized hardware upgrades (e.g., adding memory, NVMe SSDs, or other components) leading to system instability or failure
- Incorrect firmware flashing or upgrade failure
- Boot failure due to improper operations
- Physical damage (drop, impact, water damage)
- Lightning damage without proper grounding
- Deployment in non-compliant environments

Process:

1. Customer ships the device
2. Inspection completed within **10 working days**
3. Quotation provided → customer confirmation → repair begins
4. Device returned after repair

Repair report available upon request.

## 5. Software Issues (Within Support Period)

For software-related issues within the support period, Asterfusion provides:

- Remote troubleshooting
- Bug fixes and patches
- Upgrade guidance

No device return is required.

## 6. Logistics and Tracking

Tracking numbers will be provided for all shipments, allowing real-time monitoring of repair and logistics status.

## 7. Post-Warranty Policy

### 7.1 Hardware Warranty Extension

Standard warranty: 2 years

Extended warranty pricing:

- 3rd year: **4% of system price**
- 4th year: **5%**
- 5th year: **6%**
- Thereafter: **10% annually**

⚠ If warranty coverage lapses, **back payment is required before reactivation.**

If extended warranty is not purchased:

- Repairs become chargeable
- Inspection and replacement parts are billed separately

### 7.2 Software Support Extension

After the first year:

- Major version upgrades require **10% annual subscription (system-based)**

Without subscription:

- Bug fixes and security patches may still be provided
- Technical support, troubleshooting, and upgrades are no longer included

## 8. Conclusion

Asterfusion is committed to providing efficient, transparent, and reliable support.

This policy ensures fast issue resolution, minimized downtime, and optimal system performance.
